Home: İsmet İnönü mahallesi şehit polis Mustafa arslan sokak NO 19 İskenderun/ Hatay, 31000 Hatay (Türkiye)

ABOUT ME

AI Engineer specializing in Computer Vision, Autonomous Systems, and LLM-based applications, with hands-on experience building, training, and deploying end-to-end AI solutions. Proficient in Python, deep learning, and embedded AI, with strong expertise in object detection (YOLO), multi-object tracking, and SDR-based signal processing.
Experienced in developing real-time intelligent systems for robotics and defense applications, integrating perception, decision-making, and control, with a focus on performance optimization and production-ready deployment.

EDUCATION AND TRAINING

Bachelor's Degree in Computer Engineering

Iskenderun Technical University [24/02/2022 – 15/02/2027]

City: HATAY | **Country:** Türkiye | **Website:** https://iste.edu.tr/ | **Level in EQF:** EQF level 8

WORK EXPERIENCE

Teknofest Team Project (GÖKE PRUVA) – ISTANBUL, Türkiye

Computer vision specialist

[15/09/2025 – Current]

Developed an AI-powered autonomous unmanned surface vehicle (USV) capable of real-time navigation and decision-making. The system integrates multi-sensor fusion (GPS, LiDAR, and camera) for environmental perception, combined with YOLO-based object detection and DeepSORT tracking. Designed autonomous navigation and obstacle avoidance algorithms, and deployed optimized deep learning models on NVIDIA Jetson using TensorRT. The system was integrated with Pixhawk via MAVLink and ROS2, and validated through real-world testing in dynamic marine environments.

Teknofest Team Project (ANKA GM - ŞAHİ) – ISTANBUL, Türkiye

Computer vision project engineer

[19/11/2025 – Current]

Developed a real-time computer vision system for aerial target detection and tracking using YOLOv8 and ByteTrack. Utilized stereo vision (ZED camera) to estimate depth and calculate target distance, and designed localization algorithms based on bounding box coordinates (yaw/pitch estimation). Built an autonomous classification system for friend/enemy identification and deployed the solution on NVIDIA Jetson Orin NX with TensorRT optimization. The system was integrated with embedded control units (STM32) for real-time execution and tested under operational conditions.

Teknofest Team Project (Electronic Warfare System) – ISTANBUL, Türkiye

Computer numerical control machine operator

[11/02/2026 – Current]

Designed and developed an SDR-based electronic warfare system combining electronic support and electronic attack capabilities. Processed RF signals using FFT, PSD, and spectrogram analysis to detect, analyze, and extract key signal parameters such as frequency, bandwidth, and modulation type. Implemented AI-based signal classification using CNN models, along with direction finding and triangulation algorithms for target localization. Developed intelligent jamming and RF attack strategies, and deployed the system on NVIDIA Jetson Orin NX for real-time operation.

Nwat-Alnahda – ISTANBUL, Türkiye

Robotics engineer

[21/05/2025 – 12/11/2025]

- Developed real-time ball balancing robot using OpenCV and STM32
- Implemented vision-based tracking and control system
- Integrated ROS2 and motion planning for robotic platform
- Built end-to-end system combining perception and actuation

ISTE – ISKENDERUN, Türkiye

Research engineer

[16/01/2025 – Current]

- Developed AI-powered chatbot using Large Language Models (LLMs)
- Applied prompt engineering and fine-tuning techniques
- Designed NLP pipeline for healthcare-related applications
- Integrated conversational AI into real-world use cases

SKILLS

machine learning / Artificial Intelligence / computer vision / image recognition / signal processing

LANGUAGE SKILLS

Mother tongue(s): Arabic

Other language(s):

Turkish

LISTENING C2 **READING** C2 **WRITING** C2

SPOKEN PRODUCTION C2 **SPOKEN INTERACTION** C2

English

LISTENING B2 **READING** B2 **WRITING** B1

SPOKEN PRODUCTION B2 **SPOKEN INTERACTION** B2

French

LISTENING B1 **READING** B1 **WRITING** A2

SPOKEN PRODUCTION B2 **SPOKEN INTERACTION** B1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

DRIVING LICENCE

Driving Licence: B 2024

VOLUNTEERING

[23/09/2025 – 16/02/2026] HATAY

TEGV - Türkiye Eğitim Gönüllüleri Vakfı

I have been volunteering with TEGV, a non-profit organization dedicated to supporting education and providing interactive learning opportunities for children across Turkey.
